Tenzing Sherpa
Full Stack Web Developer

thesherpatenzing@gmail.com ❖ (347) 609-1224 ❖ Teaneck, NJ   [Portfolio](#) || [GitHub](#) || [LinkedIn](#)

SKILLS

JavaScript | React | Ruby | Rails | HTML5 | CSS | Tailwind CSS | Git | PostgreSQL | SQL | Heroku | Visual Studios

WORK EXPERIENCE

Project Intern / Freelance
Prime America Nepal INC   **Feb 2022 – Apr 2022**
- Developed a responsive website so customers can browse through and purchase authentic Nepali products, helping them become an ecommerce business
- Troubleshot user issues both front facing and remotely
- Designed and developed the backend, database and RESTFUL API with Active Records, PostgreSQL, and custom controller actions
- Designed the client-side features using React hooks and components to render and update relevant product data

Project Intern
KD Truck Line LLC   **Oct 2021 – Dec 2021**
- Developed a responsive web page for the trucking company so customers have easy access to management and their current product travel time
- Worked closely with the client to ensure the design and functionality were as they wanted
- Designed and developed the backend, database and RESTFUL API with Active Records, PostgreSQL, and custom controller actions
- Designed the client-side features using React hooks and components to render and update relevant product data

PROJECTS

Forecast-R – [Github](#) | [Site](#)
- Front-end app allows users to enter a location and receive current and forecast weather data for the location
- Built using React hooks and components and using the OpenWeatherMap API with async/await

Reciplease – [Github](#) | [Site](#) | [Demo](#)
- App allows users to register and join an online community where people can share their recipes with others
- Frontend built using CSS, React Hooks and components and backend using Rails

NBA Today – [Github](#) | [Demo](#)
- App allows users to register and join a message board and interact with other NBA fans. The app features the latest news, player stats, and allows users to stay up to date on all things NBA related
- Frontend built using CSS, React Hooks and components and backend using Rails
